

SUBJECT

INTENT

At Coatham we believe that Geography helps to provoke and provide answers to questions about the natural and human aspects of the world. Children are encouraged to develop a greater understanding and knowledge of the world, as well as their place in it. The geography curriculum enables children to develop knowledge and skills that are transferable to other curriculum areas and which can and are used to promote their spiritual, moral, social and cultural development. Geography is, by nature, an investigative subject, which develops an understanding of concepts, knowledge and skills.

The curriculum is designed to ensure that teaching equips pupils with knowledge about diverse places, people, resources and natural and human environments, together with a deep understanding of the Earth's key physical and human processes. As pupils progress through the school, their growing knowledge about the world helps them to deepen their understanding of the interaction between physical and human processes, and of the formation and use of landscapes and environments so that our children, "learn not for school but for life."

IMPLEMENTATION

Geography at Coatham is taught in blocks throughout the year, so that children can achieve depth in their learning. Teachers have identified the key knowledge and skills of each blocked topic and these are mapped across the school, ensuring that knowledge builds progressively and that children develop skills systematically. Existing knowledge is checked at the beginning of each topic, this ensures that teaching is informed by the children's starting points and that it takes account of pupil voice, incorporating children's interests. Tasks are selected and designed to provide appropriate challenge to all learners, in line with the school's commitment to inclusion. At the end of each topic, key knowledge is reviewed by the children and rigorously checked by the teacher and consolidated as necessary.

The local area is fully utilised to achieve the desired outcomes, with extensive opportunities for learning outside the classroom embedded in practice.

IMPACT

Outcomes in topic and literacy books, evidence a broad and balanced geography curriculum and demonstrate children's acquisition of identified key knowledge relating to each of the identified national curriculum strands, as appropriate to key stage; locational knowledge, place knowledge and human and physical geography. This is in addition to the development and application of key skills, supported by fieldwork.

As children progress throughout the school, they develop a deep knowledge, understanding an appreciation of their local area and its place within the wider geographical context.

Geographical understanding, as well as children's spiritual, moral, social and cultural development is further supported by the school's work on Children's Rights through our Rights Respecting work and Eco club.
